

Ingredient Selection. Helping you choose the right ingredients at good values is only one of many ways we serve your firm.

Size. We can furnish you with the particle size you desire by grinding and screening the product to your specifications, or we can pelletize it.

Packaging. Products can be packaged in bulk, cardboard boxes, fiber or metal drums; frozen nude blocks; 5-, 10-, 25-, 50- or 100-pound paper bags; or tote bags or boxes.

Shipping. We can ship to your facilities by convertible, dump, hopper, pneumatic, refrigerated, tank, van or walking-floor truck; by box, hopper, air-slide hopper or tank railroad car; by barge or by vessel.

Delivery. We deliver the materials you want when you need them.

Because our experts understand the peculiar and unique market variations for a broad assortment of feed ingredients, they can advise you on the best time to buy, either short-term or long-term, to secure a steady supply of materials at favorable prices.

No one company knows of all the numerous items the feed industry has to offer, but Cereal Byproducts knows more than most. Use us as a resource the next time you are purchasing ingredients. Our assistance is only a phone call away!

Buy your ingredients from one of the oldest and most respected suppliers in the feed industry by contacting us at:

Cereal Byproducts Company®
SERVING THE FEED AND FOOD INDUSTRIES SINCE 1917

Publication #DTD02-12

**Cereal
Byproducts
Company®**

**Your Source
for Ingredients**

Since 1917, Cereal Byproducts Company has provided manufacturers with the raw materials necessary to produce finish feed products. The company handles an enormous variety of feed ingredients generated by various segments of the food industry from across the United States and around the world. Whether the finish feed product you produce is for small or large mammals, birds, fish, reptiles or insects, Cereal Byproducts has the ingredients your feed formulas require.

We recognize expenditures for feed ingredients represent a sizable portion of your production costs. Our primary purpose is to add value to your purchasing dollars. Specialists on our expert staff are ready and willing to discuss with your nutritionist and other members of your production team potential benefits of using alternative feed ingredients, assorted modes of transportation, different types of packaging and improved delivery schedules.

These are some of the ingredients
Cereal Byproducts can offer you:
